ORDINANCE NO. 7**BACHELOR OF MEDICINE AND BACHELOR OF
SURGERY(M.B.B.S.)****AIMS & OBJECTIVES****1.1 AIMS**

- 1.1.1 Graduate medical curriculum is oriented towards training students to undertake the responsibilities of a physician of first contact who is capable of looking after the preventive, promotive, curative & rehabilitative aspect of medicine.
- 1.1.2 With wide range of career opportunities available today, a graduate has a wide choice of career opportunities. The training, though broad based and flexible shall aim to provide an educational experience of the essential [^required for health care in our country. Training is designed to meet internationally acceptable standards.
- 1.1.3 To undertake the responsibilities of service situations which is a changing condition and of various types, it is essential to provide adequate placement training tailored to the needs of such services as to enable the graduates to become effective instruments of implementation of those requirements. To avail of opportunities and be able to conduct professional requirements, the graduate shall endeavour to have acquired basic training in different aspects of medical care.
- 1.1.4 The importance of the community aspects of health care and of rural health care services is to be recognized. This aspect of education & training of graduates shall be adequately recognized in the prescribed curriculum. Its importance has been systematically upgraded over the past years and adequate exposure to such experiences should be available throughout all the three phases of education & training. This has to be further emphasized and intensified by providing exposure to field practice areas and training during the internship period. The aim of the period of rural training during internship is to enable the fresh graduates to function efficiently under such settings.
- 1.1.5 The educational experience shall emphasize health and community orientation instead of only disease and hospital orientation or being-concentrated - on-curative -aspects. As such -all the basic concepts of modern scientific medical education are to be adequately dealt with.

- 1.1.6 There, must be enough experiences to be provided for self learning. The methods and techniques that would ensure this must become a part of teaching-learning process.
- 1.1.7 The medical graduate of modern scientific medicine shall endeavour to become capable of functioning independently in both urban or rural environment. He/she shall endeavour to give emphasis on fundamental aspects of the subjects taught and on common problems of health and disease avoiding unnecessary details of specialization.
- 1.1.8 The importance of social factors in relation to the problem of health and diseases shall receive proper emphasis throughout the course and to achieve this purpose, the educational process shall also be community based than only hospital based. The importance of population control and family welfare planning shall be emphasized throughout the period of training with the importance of health and development duly emphasized.
- 1.1.9 Adequate emphasis is to be placed on cultivating logical and scientific habits of thought, clarity of expression and independence of judgment, ability to collect and analyse information and to correlate them.
- 1.1.10 The educational process shall be placed in a historic background as an evolving process and not merely as an acquisition of a large number of disjointed facts without a proper perspective. The history of Medicine with reference to the evolution of medical knowledge both in this country and the rest of the world shall form a part of this process.
- 1.1.11 Lectures alone are generally not adequate as a method of training and are a poor means of transferring/acquiring information and even less effective at skill development and in generating the appropriate attitudes. Every effort shall be made to encourage the use of active methods related to demonstration and on first hand experience. Students will be encouraged to learn in small groups, through peer interactions so as to gain maximal experience through contacts with patients and the communities in which they live. While the curriculum objectives often refer to areas of knowledge or science, they are best taught in a setting of clinical relevance and hands on experience for students who assimilate and make this knowledge a part of their own working skills.
- 1.1.12 The graduate medical education in clinical subjects shall be based primarily on out-patient teaching, emergency departments and within the community including peripheral health care institutions. The out-patient departments shall be suitably planned to provide training to graduates in small groups.
- 1.1.13 Clinics shall be organised in small groups of preferably not more than 10 students so that a teacher can give personal attention to each student with a view to improve his skill and competence in handling of the patients.
- 1.1.14 Proper records of the work shall be maintained which will form the basis for the students' internal assessment and shall be

available to the inspectors at the time of inspection of the college by the Medical Council of India.

- 1.1.15 Maximal efforts shall be made to encourage integrated teaching between traditional subject areas using a problem based learning approach starting with clinical or community cases and exploring the relevance of various preclinical disciplines in both understanding and resolution of the problem. Every attempt shall be made to de-emphasize compartmentalisation of disciplines so as to achieve both horizontal and vertical integration in different phases.
- 1.1.16 Every attempt shall be made to encourage students to participate in group discussions and seminars to enable them to develop personality, character, expression and other faculties which are necessary for a medical graduate to function either in solo practice or as a team leader when he begins his independent career. A discussion group shall not have more than 20 students.
- 11.17 Faculty member shall avail modern educational technology while teaching the students and to attain this objective, Medical Education Units/ Departments shall be established in the medical college for faculty development and providing learning resource material to teachers.
- 1.1.18 To derive maximum advantage out of this revised curriculum, the vacation period to students in one calendar year shall not exceed one month, during the 4 Vz years Bachelor of Medicine and Bachelor of Surgery (MBBS) Course.
- 1.1.19 Institution shall insure that adequate financial and technical inputs are provided.
- 1.1.20 History of Medicine the students will be given an outline on History of Medicine. This will be taught in an integrated manner by subject specialists and will be coordinated by the Medical Education Unit of the Institution.
- 1.1.21 The Institution shall have a curriculum committee which would plan curricula and instructional method which will be regularly updated.

2.3 INTERNSHIP

2.3.1 General - Internship is a phase of training wherein a graduate is expected to learn methods/modalities for actual practice of medical and health care and acquire skills under supervision so that he/she may become capable of functioning independently.

2.3.2 In order to make trained work force available, it may be considered as a phase of training wherein the graduate is expected to conduct actual practice under «the supervision of a trained doctor. The learning methods and modalities have to be done during the MBBS course itself with larger number of hands on session, practice on simulators including zoes models.

2.3.3 Specific Objectives

At the end of the internship training, the student shall be able to:

2.3.3.1 Diagnose clinical common disease conditions encountered in practice and make timely decision for referral to higher level;

2.3.3.2 Use discreetly the essential drugs, infusions, blood or its substitutes and laboratory services.

2.3.3.3 Manage all type of emergencies-medical, surgical obstetric, neonatal and paediatric, by rendering first level care;

2.3.3.4 Demonstrate skills in monitoring of the National Health Programme and schemes, oriented to provide preventive and promotive health care services to the community;

2.3.3.5 Develop leadership qualities to function effectively as a leader of the health team organised to deliver the health and family welfare service in existing socio-economic, political and cultural environment;

2.3.3.6 Render services to chronically sick and disabled (both physical and mental) and to communicate effectively with patient and the community.

2.3.4 Time allocation to each discipline is approximate and shall be guided more specifically by the actual experience obtained. Thus a student serving in a district or taluk hospital emergency room may well accumulate skill in surgery, orthopaedics, medicine, obstetrics and Gynaecology and Paediatrics during even a single night on duty. Responsible authorities from the medical college shall adjust the intern experience to maximize intern's opportunities to practice skills in patient care in rough approximation of the time allocation suggested.

Internship - Time Distribution

The students shall answer Section C immediately and the papers shall be collected back after 20 minutes.

- 17.3 In the subjects of Physiology & Biochemistry and Pathology & Microbiology each paper will be divided into two parts with Physiology in part A and Biochemistry in part B, similarly Pathology in part A and Microbiology in part B with 30 marks each. Section C1 and C2 shall contain 10 Objective type questions from respective subjects.
- 17.4 The nature of questions set, will be aimed to evaluate students of different standards ranging from average to excellent,
- 17.5 The questions should cover as broad an area of the content of the course. The essay questions should be properly structured and the marks specifically allotted.

18.0 SCHEME OF PRACTICAL / CLINICAL EXAMINATION:

Objective Structured Clinical Evaluation:

- 18.1 The clinical and practical examination should provide a number of chances for the candidate to express one's skills. A number of examination stations with specific instructions to be provided. This can include clinical procedures, laboratory experiments, spotters etc. Evaluation must be made objective and structured. The method of objective structured clinical examinations should be followed. This will avoid examiner bias because both the examiner and the examinee are given specific instructions on what is to be observed at each station.

18.2 Record & Log Books:

The candidate should be given credit for his/her records based on the scores obtained in the record. The marks shall form part of practical/clinical examination.

19.0 VIVA VOCE:

Viva voce is an excellent mode of assessment because it permits a fairly broad coverage and it can assess the problem solving capacity of the student. An assessment related to the affective domain is also possible through viva voce. It is desirable to conduct the viva voce independently by each examiner. In order to avoid vagueness and to maintain uniformity of standard and coverage, questions can be pre-formulated before administering them to each student. Twenty marks are exclusively allotted for viva voce and that can be divided equally amongst the examiners, i.e., 10 marks per examiner.

20.0 MARKS DISTRIBUTION IN EACH SUBJECT:

- 20.1 Each subject except pre-clinical Prosthodontics and pre-clinical Conservative dentistry in 2nd BDS, shall have a maximum of 200 marks as under:
